

Erith Muñoz

Curriculum Vitae

About myself

I am a self-motivated person interested in getting deeper knowledge about science and technology. My living experience has taught me that I am able to accomplish everything that I decide to fight for, even the hardest ones. My research interest include theoretical and computational Physics, Applied Physics, Engineering and Technology, Electronics and Telecommunication, Digital Signal and Image Processing, Scientific Programming, Big Data and Data Mining, Computational and Industry automation, Remote Sensing Applications Development, Data Analysis. Suddenly, It could seems a large number of disciplines for a person, however I am convinced that science is a big cake in which everything is connected, and this is the secret to be an innovator from my point of view, in order to find solutions to real problems through science and engineering. Also, I love baseball and basketball, and playing my acoustic guitar.

Education

- 2001–2007 **Degree in Physics (5 years)**, *Universidad de Carabobo*, Venezuela.
Final Research Report: Mesoscale Atmospheric Hydrostatic Model
- 2008–2012 **Master in Electrical Engineering**, *Universidad de Carabobo*, Venezuela.
- 2011–2014 **Master in Remote Sensing Techniques applied to Early Warning and Response to Natural Disasters**, *Universidad Nacional de Córdoba, National Commission for Space Activities*, Argentina.

Final Research Report for Master Degree

Master in Electrical Engineering

Title *Estimation of temperature variations in oil from the absorption of electromagnetic power using FDTD*

Advisers MSc. Paulino Del Pino & Dr. Alfonzo Zozaya

Machala y Figueroa – Quito, Pichincha

☎ (00593) 988361856 • ☎ (00593) 2 6016798 • ✉ erith7@gmail.com

1/7

Description In this work, the Yee algorithm is implemented to solve numerically the Maxwell's equations in order to estimate variations of temperature in oil due to absorption of microwave power in an computational experiment. In this context, the finite difference method was used to solve the Fourier-Maxwell equation of heat transport to estimate the temperature in the oil medium, and likewise the Andrade equation is used to evaluate changes in viscosity, aimed to find a set of heating parameters, such as frecuency and power, to facility the process of heavy oil extraction.

Master in Remote Sensing

Título *Rain Rate Estimates using ATMS Data and Artificial Neural Networks*

Advisers Dr. Francesco Di Paola & Prof. Mario Lanfri

Description In this work an algorithm to retrieve rain rate using the passive microwave sensor ATMS, aboard of the space-born suomi-NPP of NOAA, is presented. The algorithm is based on a artificial neural network approach implemented in ALGLIB. ALGLIB is a C++ open source library which presents several facilities to train artificial neural networks. The algorithm was designed to retrieve rain rate using an artificial neural network trained using the L-BFGS method. The results shown good accuracy in precipitation patterns estimates

Teaching Experience

2015– **Partial Time Professor**, UNIVERSIDAD SAN FRANCISCO DE QUITO, Ecuador.
area: Mathematics

2007–2011 **Associated Professor**, UNIVERSIDAD JOSÉ ANTONIO PÁEZ, Venezuela.
area: Physics

2007–2010 **Assistant Professor**, POLITÉCNICO SANTIAGO MARIÑO, Venezuela.
area: Physics

2007–2010 **Assistant Professor**, UNIVERSIDAD DE CARABOBO, Venezuela.
area: Physics

2007–2008 **Assistant Professor**, UNIVERSIDAD EXPERIMENTAL DE LA FUERZA ARMADA, Venezuela.
area: Electromagnetic Theory 1 y 2, Transmissions Lines, Physics 4

Professional Experience

2015–Actual **Consultant**, THE FOOD AND AGRICULTURE ORGANIZATION, Ecuador.
Development of Allometric Models, Forest Change Detection, design of forest/Non-forest methodology, Carbon Map Generation, Assessor in M&MRV Strategies Design, Computational Automation, Numerical Modeling Algorithm Development, Uncertainties Computations of the Forest Reference Emission Levels

List of Products Generated:

1. A Script (C++ and C-shell/UNIX) set for automatic generation of a Carbon Map using a Landsat mosaic and data from permanent parcels for forest biomass measurement, using Open Foris Geospatial Toolkit, OPENCV, and GDAL.
2. A Script (C++ and C-shell/UNIX) set for automatic generation of Forest/Non-Forest map, and change detection map for deforestation, using Open Foris Geospatial Toolkit, OPENCV, and GDAL.

Machala y Figueroa – Quito, Pichincha

☎ (00593) 988361856 • ☎ (00593) 2 6016798 • ✉ erith7@gmail.com

2/7

3. A Script (C++ and C-shell/UNIX) set for both automatic preprocessing and processing of Landsat images including: radiometric calibration, TOA conversion, layerstack building, compositos and mosaic generation, in an automatic way for large numerous path-row data sets, using Open Foris Geospatial Toolkit, OPENCV, and GDAL.

- 2013–2014 **Technical Head of Project**, ECUADORIAN SPACE INSTITUTE, Ecuador.
Management of research activities in Optical y SAR remote sensing, numerical modeling, climatic and hydro-meteorological characterization, developer of a morfoclimatic model.
- 2012 **Visiting Researcher**, NATIONAL RESEARCH COUNCIL(CNR), Bologna-Italia.
Training and Researches in weather numerical models and atmospheric remote sensing techniques
- 2010–2011 **Numerical Modeling Specialist**, METEOROLOGICAL AND HIDROMETEOROLOGICAL NATIONAL INSTITUTE(INAMEH), Venezuela.
Operational Automation of gauges networks data transfer, Parametrization of the weather numerical models, and Physical Instrumentation.
- 2007–2008 **Regional Adviser**, VENEZUELAN SOCIETY FOR SCIENCES ADVANCES. (ASOVAC- CAPÍTULO CARABOBO), Venezuela.

Miscellaneous

- 2013 **Consultant in Geostatistic**, *Grupo Turbo de Ecuador*, Ecuador, Advisor for a regional analysis of scientific and technical feasibility for wireless internet project development in Latin America.
- 2013–2014 **Consultant in the area of electronic security**, *Grupo Turbo de Ecuador*, Ecuador, RFID Technology Developer.
- 2009-2011 **Consultant in the area of programming microcontrollers**, *Electrónica 1*, Venezuela, Consultant in developing new technologies and implementing for PIC and PICAXE devices.

Academic Awards and Funding

- 2011 Research Training in the Italian Research Council (Bologna- Italy)
- 2011 Scholarship for graduate studies by the National Commission on Space Activities of Argentina and the Italian Space Agency
- 2011 Selected by the Venezuelan Agency for Space Activities (Venezuela), to compete in the call process for academic grants of the National Commission on Space Activities of Argentina and the Italian Space Agency
- 2007 Scholarship for Master by the National Endowment for Science and Technology, Venezuela

Membership and Associations

- Laboratory for Applied Electromagnetism, Universidad de Carabobo, Venezuela. (Researcher Member)
- Member of the National Commission for Geophysics of the Pan American Institute of Geography and History (PAIGH-Ecuador)
- Executive Member of the Latin American Group for Remote Sensing Applications on Epidemiology. (CONAE-Argentina)

Machala y Figueroa – Quito, Pichincha

⌚ (00593) 988361856 • ☎ (00593) 2 6016798 • ✉ erith7@gmail.com

3/7

Computational Skills

- Basic JAVA, C#.
- Medium PYTHON, ARCGIS, ADS, IDRISI.
- Advanced LATEX, Linux, Microsoft Windows, SPSS, ENVI-SARSCAPE-LIDAR, Shell/UNIX, CST-MWS, MULTISIM, C/C++, FORTRAN, R-CRAN, Matlab, IDL.

Update Professional courses

1. **Geospatial Information Modeling.** Realizado del 27 al 31 de Enero de 2014 en el Centro Panamericano de Estudios e Investigaciones Geográficas de Quito-Ecuador. (48 horas)
2. **Geographical Information Management.** Realizado del 13 al 31 de Marzo de 2014 en el Centro Panamericano de Estudios e Investigaciones Geográficas de Quito- Ecuador. (40 horas).
3. **III School of Astroparticle LAKE: Cosmic Rays, GRBs and Solar Physics.** Realizada del 20 al 25 de Enero de 2014 en la Universidad San Francisco de Quito de Ecuador. (40 horas)
4. **Third International School: Advanced Training in Epidemiology Remote Sensing Techniques.** Desde el 27/05/2013 al 07/06/2013. 80 horas. Comisión Nacional de Actividades Espaciales. Córdoba- Argentina.
5. **Biophysical Parameters Extraction from SAR Images: Techniques and Applications.** From 03/12/2012 to 07/12/2012. 40 hours. Instructor: Dr. Claudia Notarnicola. Córdoba-Argentina.
6. **Trends Analysis in forest environments using Geographic Information Systems.** 22-26 de Octubre de 2012. 40 horas. Instituto de Altos Estudios Espaciales Mario Gulich. Falda del Carmen- Argentina
